Paramount, CA

A CSULB graduate, majoring in computer science seeking full-time Software Developer position to apply my skills, solve new and interesting problems, and expand my knowledge within the field.

LOVEMO WEB APPLICATION

June 2021 –

A solo project that is inspired by Venmo. It is a web application that was implemented with the Django web framework. It will never actually be completed because I find I always want to improve and add things to it as I myself improve and add more skills to my web developing toolbelt.

HANDRAZE WEB APPLICATION

August 2019 – May 2020

Worked with a team of 5 to develop a web application that allowed students and teachers to manage courses and coursework. As well as provide an environment for the students and teachers to communicate with each other. Implemented the MERN stack to build Handraze from the ground up.

RESTAURANT DATABASE SYSTEM

August 2018 – December 2018

Led a team of 4 to develop a database management system for a simulated restaurant. Implemented UML database design with over 20 tables and created views, triggers and queries using MySQL to showcase functionality and integrity of the database.
