

DAVID GARZA

Paramount, CA · (562)250-6236

garzadavid1108@gmail.com · [LinkedIn](#) · [GitHub](#)

Currently seeking an Entry-Level Software Developer position to apply my skills, solve new and interesting problems, and expand my knowledge within the field.

PROJECTS

LOVEMO WEB APP | PYTHON, DJANGO, HTML, CSS, SQLITE, BOOTSTRAP

A solo project that is inspired by Venmo. It is a web application that was implemented with the Django web framework. It will never actually be completed because I find I always want to improve and add things to it as I improve and add more skills to my web developing toolbox.

HANDRAZE WEB APP | MERN STACK (MONGO, EXPRESS, REACT, NODEJS)

Worked with a team of 5 to develop a web application that allowed students and teachers to manage courses and coursework. As well as provide an environment for the students and teachers to communicate with each other.

RESUMATE WEB APP | PYTHON, FLASK, BS4, DOCX2PDF

Worked with a group of three to complete this hackathon project (LA Hacks). Resumate generates a resume for the user based on the skills and education they provided along with the job they are trying to get. It was developed using python and the flask web framework for the backend and react for the frontend.

RESTAURANT DATABASE SYSTEM | MYSQL, UML, SQL

Led a team of 4 to develop a database management system for a simulated restaurant. Implemented UML database design with over 20 tables and created views, triggers and queries using MySQL to showcase functionality and integrity of the database.
